

Design: Framehuggers by Camille Workman

Nowadays, we are wearing **OKKLUEASY** and that is **patching without any trauma!**

How to put on **OKKLUEASY** ...

Keep the Velcro on top and put the temple through the bigger lateral opening. Pull the fabric over the eye glass, wrap the Velcro inwards under the nose bridge and finally fix it on top of the other. Done!

For further information each package contains a detailed description of the fixing.

Watch the video online on www.okklueasy.de
